Discover the endless possibilities of our dynamic Liquid Interactive Tiles (LIT).
- 07** PRODUCT OVERVIEW 48-63
A complete overview of our collection luxury vinyl flooring

01 ABOUT DFD

Established in 2006 as PVC Floor Corporation, DFD started as a design studio based in Amsterdam. A pioneer in design and production from the start. As of 2019 PVC Floor Cooperation continues as Dutch Floor Design and presents a new collection with progressive designs.

OUR STORY

In 2006 Dutch Floor Design's founder found himself on the crossroads: continue to work as a designer at the renowned Forbo Novilon or start his own enterprise. With exceptional design skills and entrepreneurial qualities the choice was made easily, and PVC Floor Cooperation was established.

Over the years PVC Floor Cooperation has grown to become Dutch Floor Design.

Jordan Simas - Grondlegger Dutch Floor Design (1999)

*"Enjoy yourself and be inspired
by the designs of Dutch Floor Design"*

LUXURY VINYL FLOORING

*WHAT ARE VINYL FLOORS MADE OF, WHAT ARE THE
BENEFITS AND WHAT ARE THE DIFFERENT OPTIONS?*

The floors of Dutch Floor Design consist out of multiple layers of which PVC is the basis. Due to its favourable qualities PVC is a plastic that is highly suitable to be used as a basis for flooring.

PVC has been developed as an alternative to parquet, laminate (or natural stone) and is mainly used in areas where high demands are made. It is particularly strong and durable, easy to maintain, stable and quiet. PVC reduces ambient and contact noise. Moreover, very suitable in combination with underfloor heating. PVC can be installed in all areas of the house.

Due to present day technology we are able to develop very realistic designs in PVC, which can hardly be distinguished from a genuine wooden floor. Probably you have already walked on a PVC floor many times without even noticing it!

PFCSPC-03

DIFFERENCES

PVC CLICK

PVC Click consists out of a basis of hard PVC. This allows for the floor to be installed easily. On all four sides the base layer has a click connection. On top of the base layer lays the printing film with the design of the floor. The final layer is the top layer and consists out of the wear

layer and contains an embossed structure for a realistic wood pattern. Our floors are also available with an extra under floor made out of cork. This thin under floor provides extra isolation and has strong sound absorbing qualities. Our PVC Click floors are very well suited for the do-it-yourselfers.

PVC DRYBACK

A flexible PVC layer forms the basis for our dryback planks. On top of the base layer lays the printing film with the design of the floor. The top layer is the wear layer and is available with a realistic or palpable wood structure. The planks of our dryback collection fit seamlessly

together, so that they can be mounted very tightly. Because the floors are thinner you also achieve a higher efficiency for floor heating, a win-win situation!

For a professional finish, we recommend having our dryback

floors installed by a professional.

PALPABLE WOOD STRUCTURE

By pressing a warm plate that contains the wood pattern in the wear layer, the palpable wood structure is created. The wood pattern of the hot plate is identical to the design in the print film, making the boards of Dutch Floor Design almost indistinguishable from real wood.

PFC65345

REALISTIC WOOD STRUCTURE

The realistic and natural wood structure is created by a roller that presses a pattern into the wear layer, which results in a very realistic 3D effect.

1832372505

02 COMFORTABLE LIVING

De producten in ons huis zijn er om gebruikt te worden. Dit geldt ook voor de vloeren waar we op lopen, dansen, springen en af en toe een glas laten vallen. Om de esthetische aspecten van onze designs te waarborgen, gebruiken wij een unieke matte slijtlaag, waardoor onze vloeren er niet alleen prachtig uitzien in de showroom, maar ook wanneer deze liggen in een huis waarin wordt geleefd.

PET PROOF

WITHOUT HAVING TO WORRY

RESISTANT TO THE SCRATCH ATTACKS OF YOUR TINY BIG FRIEND

Because children should be free to be children and pets to be pets, without you having to worry about your floor. A floor as a canvas or as scratching post, everyone can be him or herself.

PFC6151-F

PFCHB-01

ME-TIME

In times of stress and always having to rush through life, you sometimes need to allow yourself to relax a little with a nice book and let your thoughts drift off.

03

WORK

03 CREATIVE AT THE OFFICE

In times of flex working and working from home, your office becomes an extension of your living environment. This space therefore deserves to look like it, and create a comfortable working environment that allows you to perform at your best.

CREATE

IN HARMONY AT WORK

Create the space that allows you to express your creativity. Grab your laptop, a fresh cup of coffee, put on your headphones and get started!

NATURAL CONTRAST

JUST LIKE REAL WOOD WITHOUT THE MAINTENANCE

Invite nature inside your home, by combining the designs of DFD with natural products.

04

LUXURY

04 FEEL AT HOME

Boots, sneakers, snow boots and stilettos. Our floors can handle it without compromising on design. It is pure luxury when you feel comfortable in your own home with designs from Dutch soil.

LUXURY & COMFORT

Who says that luxury and comfort do not go well together? Beautiful products only really come to life when they can be lived, and with DFD floors you don't have to worry when you live on your floor, as you shouldn't.

PFCSPC-04

RELAX

A HOME TO GROW UP IN

Kick off your shoes and drop on the couch. Just relax and make yourself feel at ease in a space that allows you to.

LESS IS MORE

Design also means creating peace and harmony in your home. Our herringbone collection consists out of calm designs that can be laid according to the herringbone principle. The installation method in combination with the designs results in a timeless and durable interior.

LINGERING AFTER DINNER

Breakfast, lunch or dinner. Be true to yourself and combine different styles; vintage, retro and modern because every day is a different day. You can lay our short planks in the style you want; herringbone, double herringbone, blocks or as normal planks.

"THESE FLOORS WERE MADE FOR WALKING"

NIGHT'S REST

COUNTING SHEEP

Dream away with our herringbone collection. The serene designs result in a harmonious and timeless interior.

05

BATH & SHOWER

05 WET AREAS

Moisture will not be a challenge for our floors, making them extremely suitable for wet areas or areas where we sometimes spill or knock over a glass.

OH NO DROPS...

Don't worry about it! Because of the high stability of the base layer, our PVC floors will not expand or shrink. This makes our floors ideal for installation in wet areas.

PFCSPC-01

DINNER TIME

TIME TO SPILL

Enjoy yourself when preparing a meal in the kitchen, alone or with the whole family. Without having to worry about spilling or leaving stains.

06 LIT

LIT stands for Liquid Interactive Tiles. These tiles are also known as **Living Art Floors**. Be inspired by a constantly changing floor for a modern and dynamic household.

NATURAL AESTHETICS COLLECTION

HONEST OAK

PURE OAK

GENUINE OAK

CLEAN OAK

INVITE NATURE INSIDE

For this collection we have been inspired by the harmony that you can only find in our nature. In times of stress we have to find time return to nature to relief ourselves from the daily rush. Balance can be found by meditating and simple self-reflection. Invite nature inside with our pure, simple and classic collection that consists out of beautiful natural colours. Find your dream floor and dream away.

Our floors are one of the greenest PVC floors that exist, because no harmful plasticizers are used during the production of our collections. The amount of volatile organic compounds (VOC) is also kept to a minimum, so that they remain in the floors. Our floors have been tested to very strict standards in the field of interior applications, this is done through, among other things, the REACH system (Registration, Evaluation, Authorization and Restriction of Chemicals).

VARIATION AND CORK

Our click collection is available in different sizes: budget, regular, XXL and the unique XXL with an extra cork underfloor for improved insulation and sound absorbing capacities!

TIMELESS DESIGN

The new click collection consists of designs with a warm and timeless feel. Thanks to the click technology, the planks can be laid quickly and easily in both construction and renovation projects. We developed a protective top layer, which has made the floor extremely stain and scratch resistant. Due to the durability our floors are also suited to be used in commercial projects.

SMOKED OAK XXL COLLECTION

Innovation, functionality and design are central to our DFD XXL collection. With these extra long planks we offer a unique length that matches the latest home interior trends. The collection is characterized by a very authentic palpable wood structure. All the planks are characterized by the no-repeat principle and extremely detailed design.

The wide and large planks in rustic designs make every room appear to be more spacious, and provides a high-end appearance. The collection is equipped with an extra fibreglass fleece as an intermediate layer to guarantee extra stability. In addition, finished with a double protective layer, resulting in a superior scratch and stain resistant product. In this way, the design remains intact and beautiful in its appearance, even in spaces that are used intensively.

LIQUID TILES COLLECTION

Liquid Interactive Tiles (LIT) are modular floor tiles that contain a mix of liquids. The moment pressure is applied on the surface, the liquids mix and move and the tiles come to life. This results in a dynamic surface with unique designs. Walking over the tiles results in a trail of footsteps.

With polycarbonate as a base material, liquid tiles are durable and easy to clean. In addition, the tile has a Security system that prevents the liquids from leaking out.

DIMENSIONS

Our Liquid Tiles are available in two standard sizes: small and large (60 x 60 cm or 100 x 100 cm). It is also possible to order tiles in a custom shape, for example that of a flower or a ball. Our liquid tiles come with a transparent top layer and white bottom layer, but it is also possible to have your company logo printed on the bottom layer.
