CONTENT

01 ABOUT DFD

When and how was DFD established, and what makes our vinyl flooring unique?

02 COMFORTABLE LIVING

A floor is the basis for any house, which you need to be able to live on. What floor fits your character best?

03 LESS IS MORE

Design also means creating peace and harmony in your home. Our herringbone collection consists out of calm designs.

04 NIGHT'S REST

Dream away with our herringbone collection. The serene designs result in a harmonious and timeless interior.

05 DINNER TIME

Enjoy yourself when preparing a meal in the kitchen, alone or with the whole family.

06 RELAX

Kick of your shoes and drop on the couch. Just relax and make yourself feel at ease in a space that allows you to do so.

07 CREATIVE AT THE OFFICE

Incorporate your office in the style of your home, and create a comfortable working environment that allows you to perform at your best.

08 FEEL AT HOME

Take your time to relax and enjoy the small things in life.

01 ABOUT DFD

Established in 2006 as PVC Floor Cooperation, DFD started as a design studio based in Amsterdam. A pioneer in design and production from the start. As of 2019 PVC Floor Cooperation continues as Dutch Floor Design and presents a new collection with progressive designs.

'UNWIND AT HOME'

02 COZY LIVING

The furniture and other products that we use to dress up our house with are meant to be used. This also applies to the floors on which we walk, dance, jump and occasionally drop a glass on. To guarantee the aesthetic aspects of our designs, we use a unique matte wear layer, so that our floors not only look beautiful in the showroom, but also when they are installed in a home that is lived in.

PALPABLE WOOD STRUCTURE

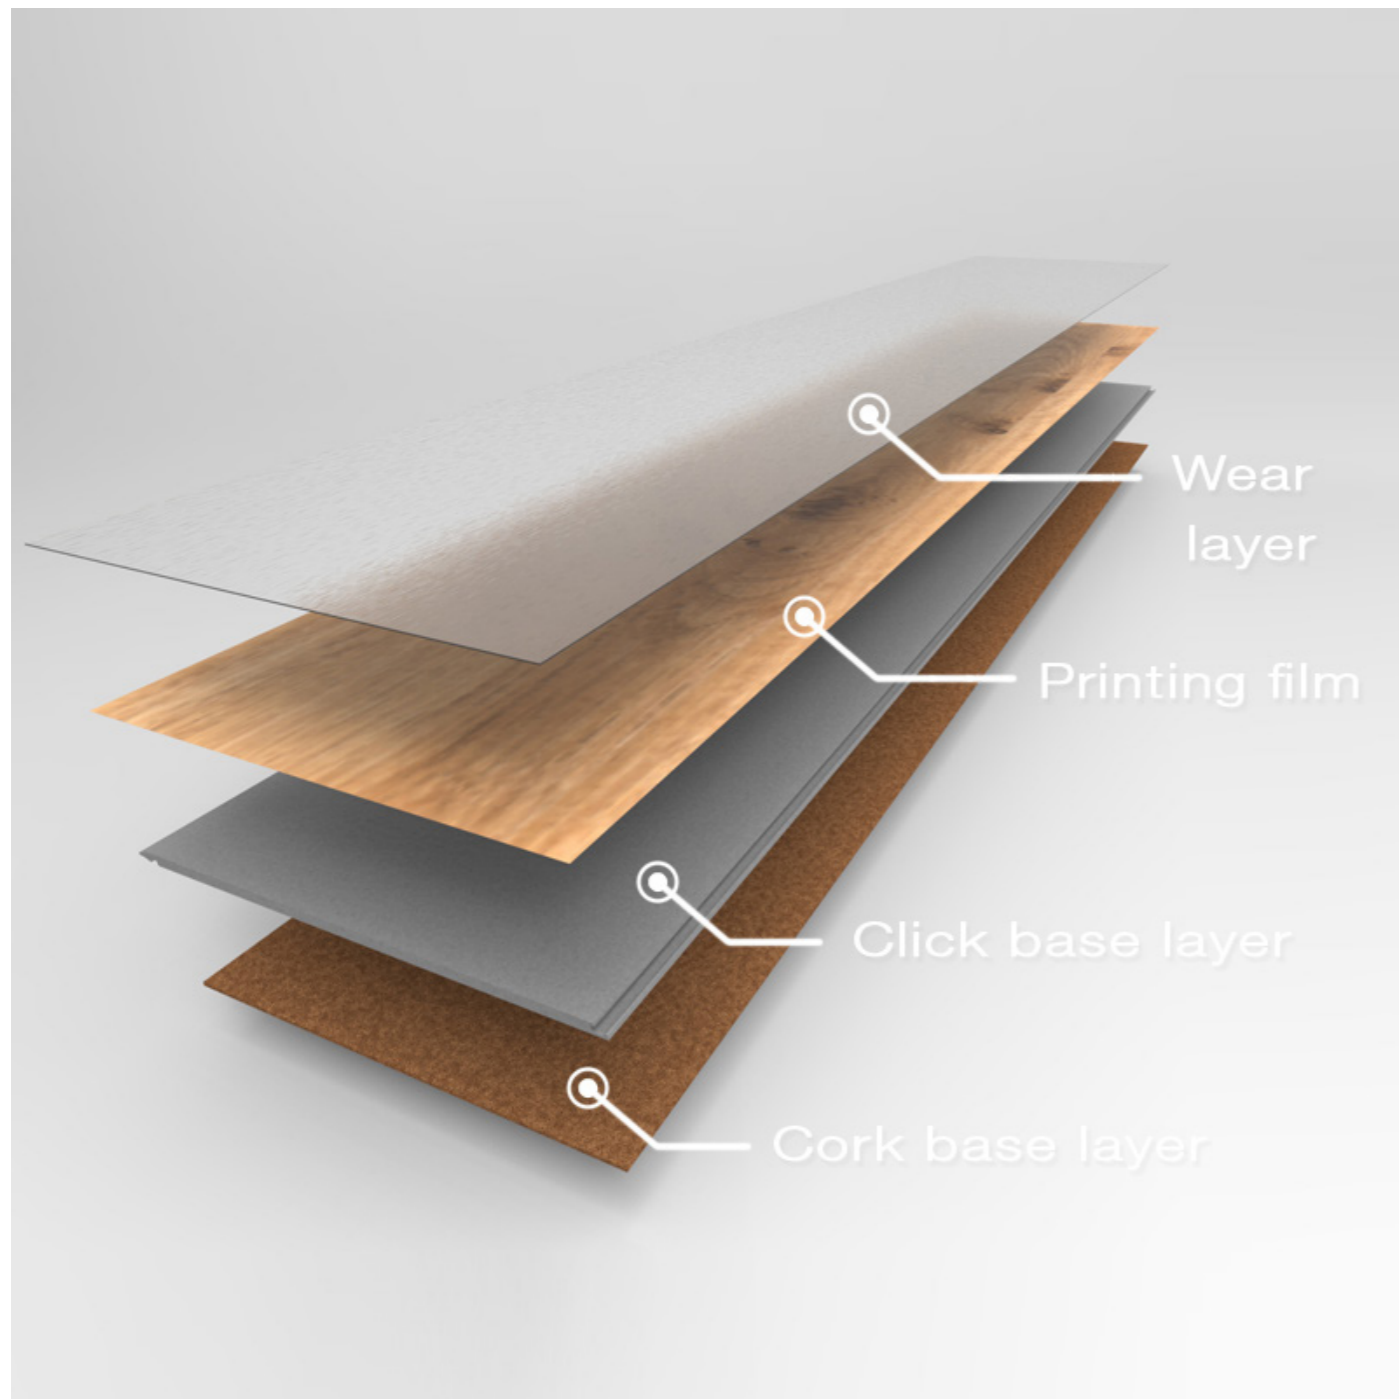

By pressing a warm plate that contains the wood pattern in the wear layer, the palpable wood structure is created. The wood pattern of the hot plate is identical to the design in the print film, making the boards of Dutch Floor Design almost indistinguishable from real wood.

REALISTIC WOOD STRUCTURE

The realistic and natural wood structure is created by a roller that presses a pattern into the wear layer, which results in a very realistic 3D effect.

DIFFERENCES

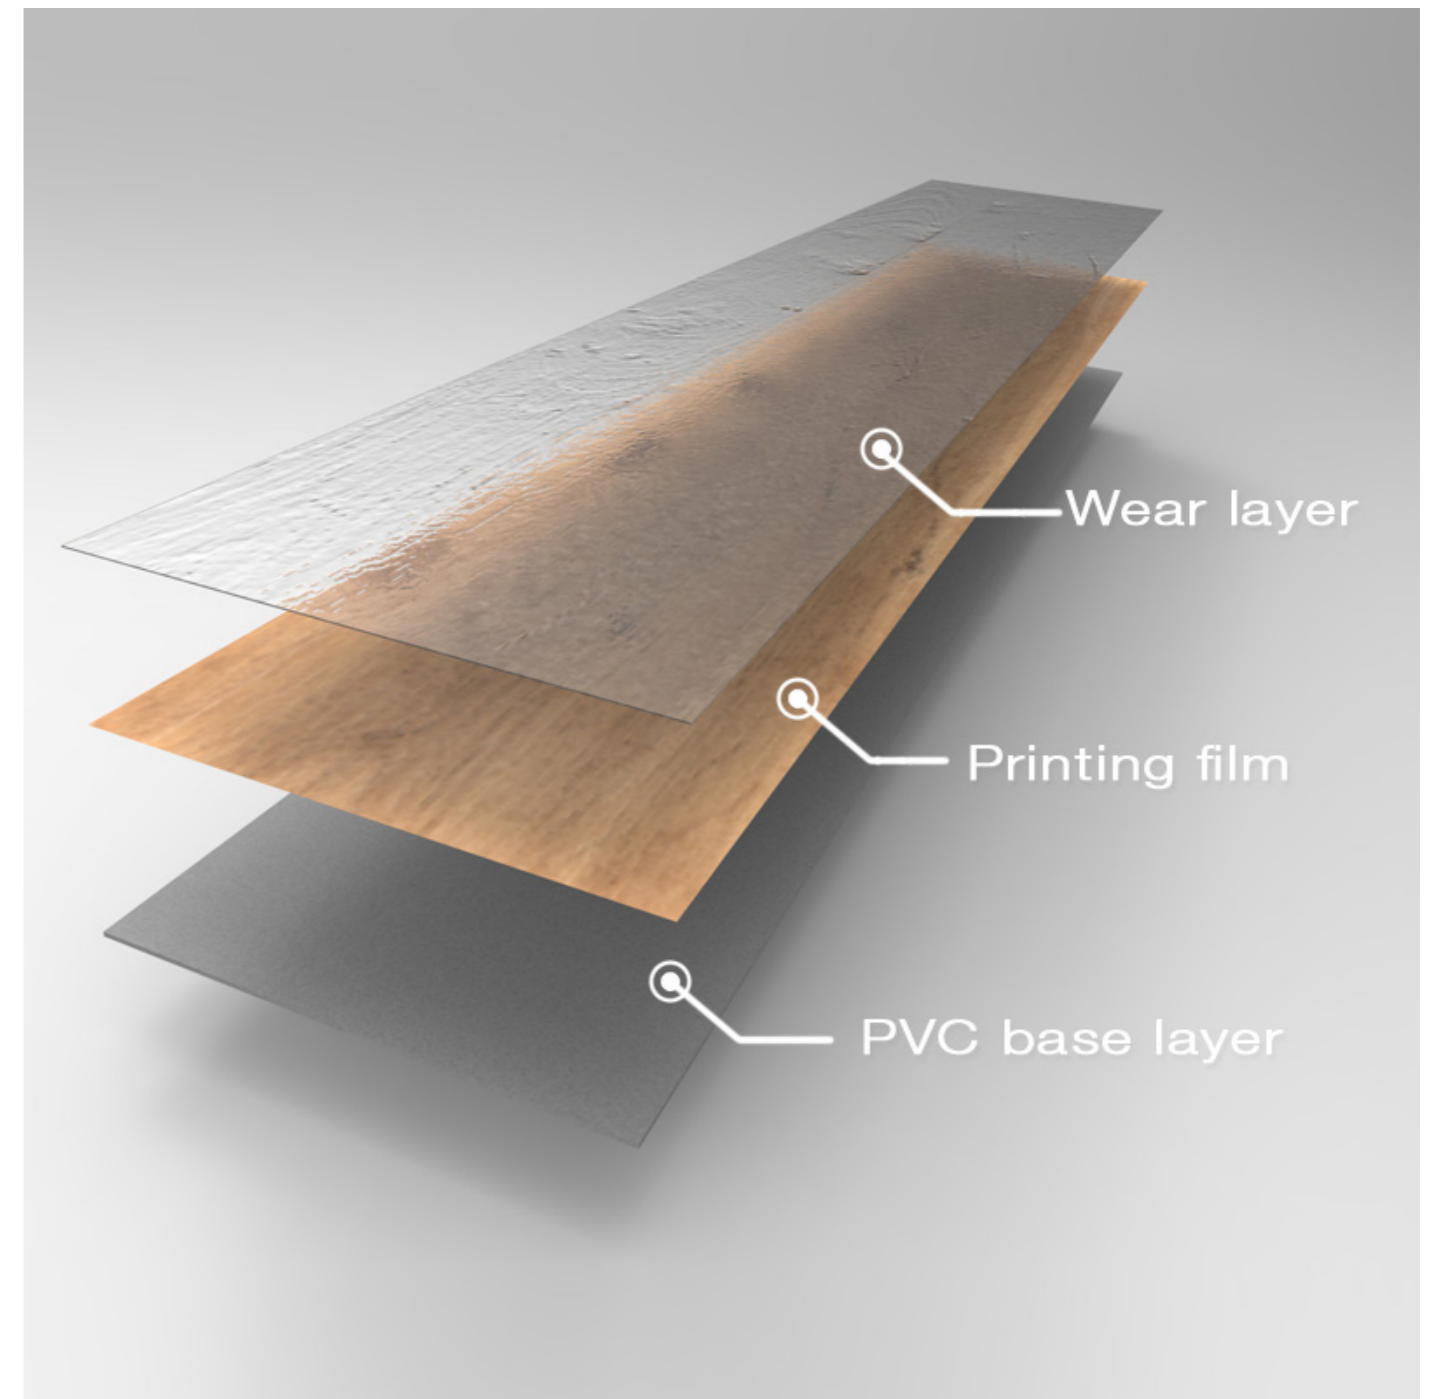

PVC CLICK

PVC Click consists of a basis of hard PVC. This allows for the floor to be installed easily. On all four sides the base layer has a click connection. On top of the base layer lays the printing film with the design of the floor. The final layer is the top layer and consists of the wear layer and

contains an embossed structure for a realistic wood pattern. Our floors are also available with an extra under floor made out of cork. This thin under floor provides extra isolation and has strong sound absorbing qualities. Our PVC Click floors are very well suited for the do-it-

yourselves.

PVC DRYBACK

A flexible PVC layer forms the basis for our dryback planks. On top of the base layer lays the printing film with the design of the floor. The top layer is the wear layer and is available with a realistic or palpable wood structure. The planks of our dryback collection fit seamlessly

together, so that they can be mounted very tightly. Because the floors are thinner you also achieve a higher efficiency for floor heating, a win-win situation! For a professional finish, we recommend having our dryback floors installed by a professional.

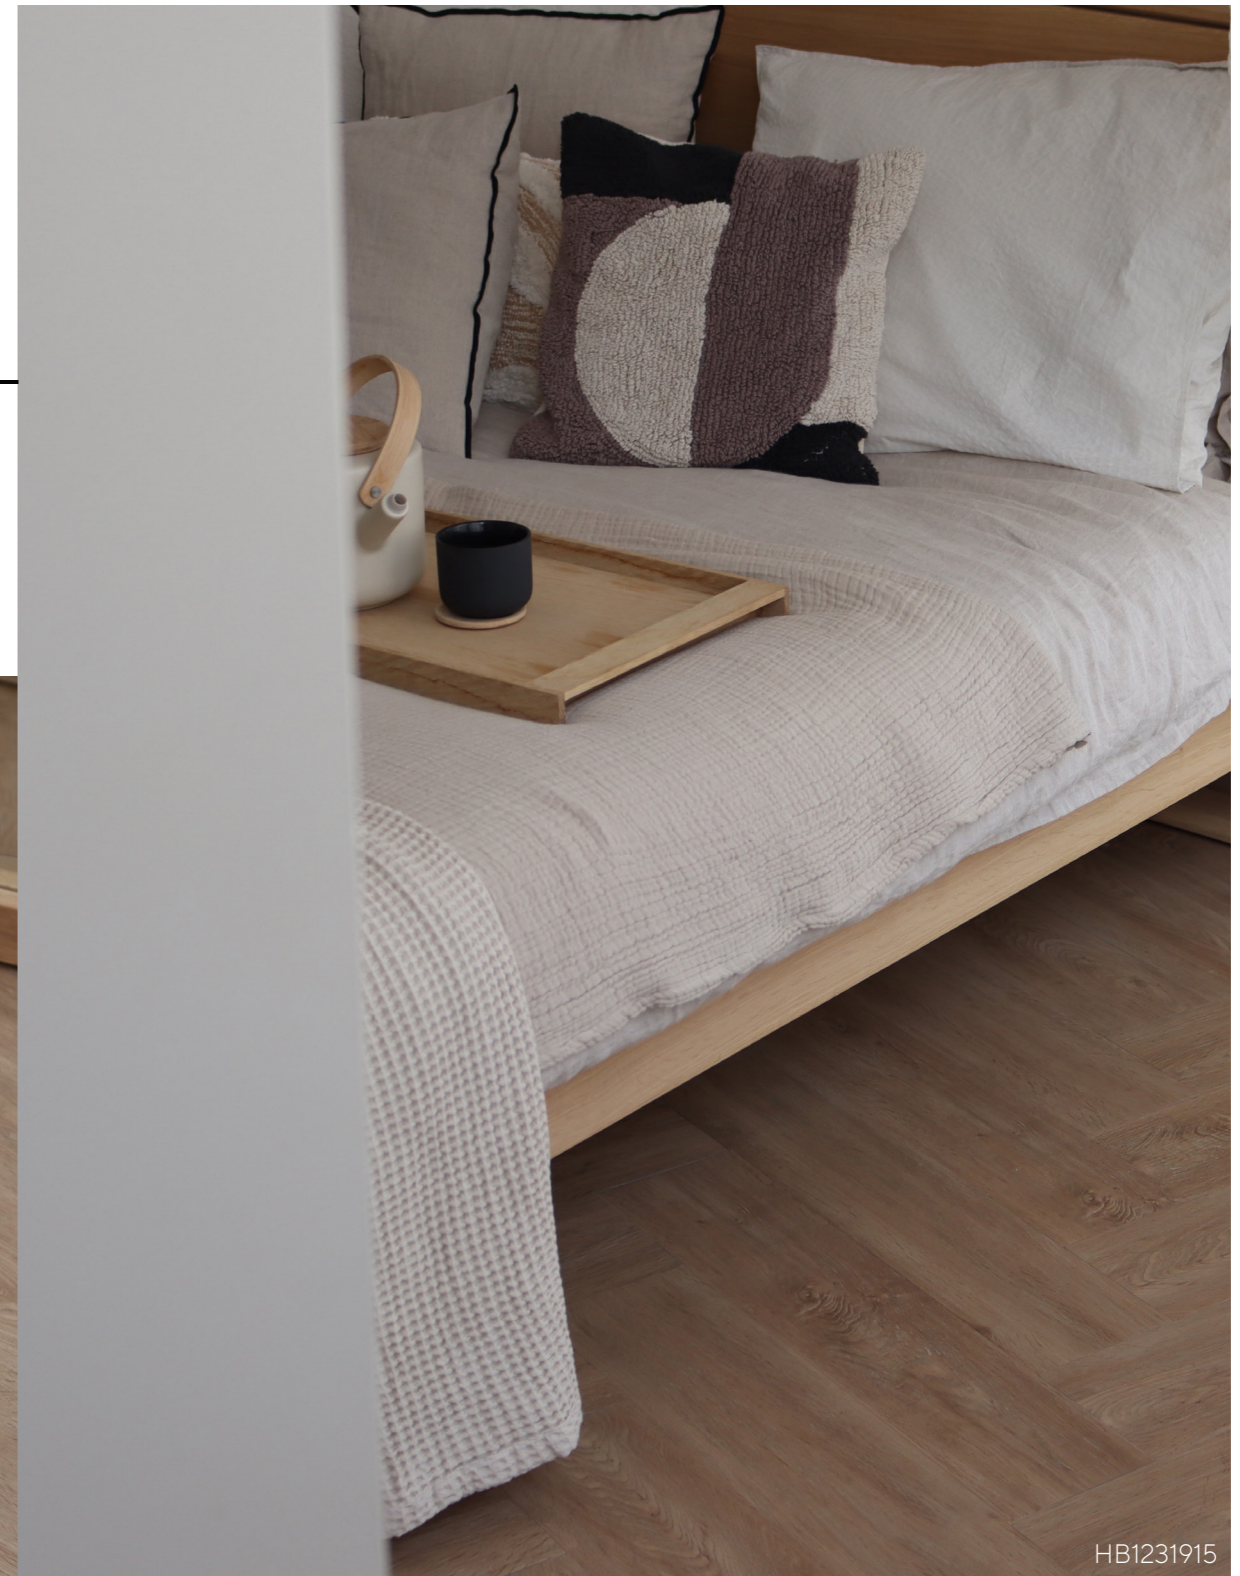

03 LESS IS MORE

Design also means creating peace and harmony in your home. Our herringbone collection consists out of calm designs that can be laid according to the herringbone principle. The installation method in combination with the designs results in a timeless and durable interior.

04 NIGHT'S REST

COUNTING SHEEP

Dream away with our herringbone collection. The serene designs result in a harmonious and timeless interior.

05 DINNER TIME

TIME TO SPILL

Enjoy yourself when preparing a meal in the kitchen, alone or with the whole family. Without having to worry about spilling or leaving stains.

06 ONTSPAN

A HOME TO GROW UP IN

Kick of your shoes and drop on the couch. Just relax and make yourself feel at ease in a space that allows you to do so.

07 CREATIVE AT THE OFFICE

In times of flex working and working from home, your office becomes an extension of your living environment. This space therefore deserves to look like it, and create a comfortable working environment that allows you to perform at your best.

CREATE

IN HARMONY AT WORK

Create the space that allows you to express your creativity. Grab your laptop, a fresh cup of coffee, put on your headphones and get started!

YOUR STYLE

Be true to yourself and combine different styles; vintage, retro and modern because every day is a different day. You can lay our short planks in the style you want; herringbone, double herringbone, blocks or as normal planks.

CAREFREE

Moisture will not be a challenge for our floors, making them extremely suitable for wet areas or areas where we sometimes spill or knock over a glass.

NATURAL CONTRAST

JUST LIKE REAL WOOD WITHOUT THE MAINTENANCE

Invite nature inside your home, by combining the designs of DFD with natural products.

08 FEEL AT HOME

Take your time to relax and enjoy the small things in life. DFD floors go exceptionally well in combination with under floor heating. DFD floors are warm and comfortable.

ENVIRONMENTALLY FRIENDLY

Our floors are one of the greenest PVC floors that exist, because no harmful plasticizers are used during the production of our collections. The amount of volatile organic compounds (VOC) is also kept to a minimum, so that they remain in the floors. Our floors have been tested to very strict standards in the field of interior applications, this is done through, among other things, the REACH system (Registration, Evaluation, Authorization and Restriction of Chemicals).

VARIATION AND CORK

Our click collection is available in different sizes: budget, regular, XXL and the unique XXL with an extra cork underfloor for improved insulation and sound absorbing capacities!

TIMELESS DESIGN

The new click collection consists of designs with a warm and timeless feel. Thanks to the click technology, the planks can be laid quickly and easily in both construction and renovation projects. We developed a protective top layer, which has made the floor extremely stain and scratch resistant. Due to the durability our floors are also suited to be used in commercial projects.

- Commercial use (33)

OUR STORY

In 2006 Dutch Floor Design's founder found himself on the crossroads: continue to work as a designer at the renowned Forbo Novilon or start his own enterprise. With exceptional design skills and entrepreneurial qualities the choice was made easily, and PVC Floor Cooperation was established. Over the years PVC Floor Cooperation has grown to become Dutch Floor Design.

Jordan Simas - Grondlegger Dutch Floor Design (1999)

*"ENJOY YOURSELF AND GET INSPIRED
BY THE DESIGNS OF DUTCH FLOOR DESIGN"*

LUXURY VINYL FLOORING

WHAT ARE VINYL FLOORS MADE OF, WHAT ARE THE BENEFITS AND WHAT ARE THE DIFFERENT OPTIONS?

The floors of Dutch Floor Design consist of multiple layers of which PVC is the basis. Due to its favourable qualities PVC is a plastic that is highly suitable to be used as a basis for flooring.

PVC has been developed as an alternative to parquet, laminate (or natural stone) and is mainly used in areas where high demands are made. It is particularly strong and durable, easy to maintain, stable and quiet. PVC reduces ambient and contact noise. Moreover, very suitable in combination with underfloor heating.

Due to present day technology we are able to develop very realistic designs in PVC, which can hardly be distinguished from a genuine wooden floor.
